Coronavirus COVID-19 – Communication from School

Dear Parent/Carer,

As we look to keep you up to date with the ongoing situation in relation to Coronavirus COVID-19, please be assured that we continue to follow national guidance and pass this on to families as we receive it. We would like to up-date you on some areas specific to our school in the short-term.

Our main form of communication will continue to be through our school website's news page; <https://2019news.school.blog/> and through individual class blogs where teacher's will convey information specific to their class. If you have not signed up to these already, please can I encourage you to do so in order that we can get up to date information to everyone promptly. This can be done by clicking on the 'Follow' section on the right hand side and adding an email address where you will receive notifications of new posts. You need to do this for both the News page and your child's class blog.

Following advice from the Council, all up and coming events have been postponed. This includes; Tempest class photos, Euroquiz, McRoberts Cross Country and UHI Shinty. We have also made the decision that due to absence and the ongoing situation, we will postpone Pirates of the Curry Bean. I know this will be a great disappointment for many of the children and it is not a decision which we have taken lightly however, I'm sure you will understand that we do this with everyone's wellbeing in mind.

We respect individual families' decisions to self-isolate and ask that you inform the school either through phone call or email, as per normal procedures. I'm sure you will understand that we are unable to contact every family regarding this or offer advice.

We thank all our families for their on-going support.

Yours faithfully,

K. Laird

Article 24: (health and health services) Every child has the right to the best possible health. Governments must provide good quality health care, clean water, nutritious food, and a clean environment and education on health and well-being so that children can stay healthy. Richer countries must help poorer countries achieve this.
